

To Our Patients –

03/22/20

During this unprecedented time, our practice will see some changes.

I took an oath to “do no harm” and my patients have become extended family to me. While I believe in-person/face-to-face examinations are the best way to practice medicine, I need to find a balance between the health of my patients, staff, and myself during the corona virus pandemic.

Information, restrictions, and guidelines are changing on a daily basis. For now, I will be offering telemedicine to provide you an opportunity to have an appointment with me via computer or smartphone.

Here’s how it will work:

1. Call our office 856 478 4780 for an appointment. Our staff will give you a time slot.
2. BEFORE your appointment, please weigh yourself, take your temperature (if you’re feeling ill), and if you have high blood pressure, please take your BP if you have a machine.
3. You will need a smart phone or computer with internet access. Your device should have a camera and microphone. At your appointment time, using Firefox, Safari or Chrome browser go to **Doxy.me/drCraigWax**
4. Please enter your full name, as well as, enable the camera and the microphone.
5. This will then take you to a virtual waiting room that will have my name on the page. I will connect as soon as I am available to start the appointment.

It is our understanding that insurance companies will pay for telehealth visits. As always, you are ultimately responsible for services not paid. Please feel free to contact your insurance company for any questions.

Stay healthy and be well,  
Craig M. Wax, D.O.
